About Britcay House

This modern 44,000 gross square feet four storey building was constructed in 2001 at the front of a large approximately 8 acre parcel of land fronted by Eastern Avenue, which passes through the capital of George Town.

The anchor tenant is British Caymanian Insurance Company, associates of the shareholders of BritCay House Limited.

The building is constructed of fibreglass reinforced panels for durability and features a central core and many energy and maintenance saving features such as Costwatch (www.costwatch.ky) by which tenants can monitor energy and water consumption. Ample parking is available alongwith full standby generator power.
