Conference Centre

The Cayman Conference Center is the culmination of many years of confidence and investment by our company into the Cayman Islands. Starting with the acquisition of Elizabethan Square in the early 1980's it includes the subsequent construction of the two largest buildings in the complex and more recently, heavy investment into the infrastructure of the complex including the refurbishment of all bathrooms, installation of back-up generation capacities, new air conditioning, refurbished lobbies, upgrades to the wooden walkways, and more.

We believe that the Conference Center fills a need in downtown George Town and we have created a world class facility with all the features and amenities necessary to conduct meetings and events to the highest standard. The Center's layout and planning contemplates diverse event usage with multiple configurations, especially when one considers the access to the courtyard area for a more relaxed event or simply a break from some business.
